

A low cost audioplayer combining audio with visual branding

In Hand Guides introduce a new form for the publication and promotion of information through their newly designed and patented low cost digital audio device. The device allows the secure storage of audio in any language, replay using earphones and re-use as it is battery operated.

SUITABLE FOR:

- **HEALTH** information - inform directly about key issues (obesity, diabetes etc.)
- **LIFESTYLE** information and promotion
- **PRODUCT** information, training compliance & issues concerning Health & Lifestyle

Note: branding on front visual can be made client specific

We also provide a full supporting service to deliver the product (audio preparation etc).
